CARE established a pilot to introduce multilingual education in early childhood education. Multilingual education was expanded to other provinces in Cambodia. The Ministry of Education, Youth and Sport initiated a similar pilot of multilingual education in pre-schools with support from UNICEF and CARE. CARE provided training of trainers to government staff so they are able to train teachers in multilingual education and provide ongoing support to multilingual education schools. CARE continues to provide training and ongoing support to MoEYS core trainers in multilingual education schools.

CARE developed pilot schools in communities in Ratanak Kiri province. This involved:
- Creating community schools and establishing School Support Committees.
- Developing the curriculum, including creating appropriate books and teaching materials.
- Recruiting and training community teachers.

CARE and ICC provided support to the Ministry of Education, Youth and Sport to develop a policy framework called the Guidelines for Bilingual Education.

Management of CARE's community pre-schools and primary schools was successfully handed over to the government.

The Ministry of Education, Youth and Sport issued the Prakas (Proclamation) on multilingual education.

A Multilingual Education National Action Plan, which commits to expand multilingual education across Cambodia was developed by the Ministry of Education, Youth and Sport with support from UNICEF and CARE. The Minister for Education, Youth and Sport approved this in December 2015.
